

HARDIK CHAUDHARY

Noida, Uttar Pradesh | hardik10chaudhary@gmail.com | [Portfolio](#) | [Linkedin](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst skilled in Python, SQL, and Machine Learning with hand on experience working on real-world datasets(10k+ records). Build and deployed ML models achieving up to 82% accuracy and develop interactive Streamlit application for real-time insights. Strong in data cleaning, EDA, visualization, and business problem-solving. Actively seeking entry-level Data Analyst opportunities.

TECHNICAL SKILLS

Languages: Python, SQL

Libraries: Numpy, Pandas, Scikit-learn, Matplotlib

Tools: Streamlit, Git, Github, Excel

Core Skills: Data Cleaning, Data Analysis, Machine Learning, Data Visualization, Exploratory Data Analysis (EDA)

Databases : MySQL (Basic Queries, Joins)

SOFT SKILLS

Soft Skills : Analytical Thinking, Problem Solving, Data Interpretation, Attention to Details

PROJECTS

Medical Cost Prediction (Machine Learning) | [GitHub](#) | [Live Demo](#)

Tools : Python, Pandas, Scikit-learn, Streamlit

- Built a machine learning model (Random Forest) using healthcare dataset (10k+records)
- Achieved ~74% accuracy after feature engineering and tuning
- Reduced manual estimation effort by ~30% using automated predictions
- Deployed a Streamlit web app for real-time cost prediction

Supply Chain Analysis | [GitHub](#)

Tools : Python, Matplotlib, Pandas

- Analyzed 10k+ logistics records to identify delays pattern and inefficiencies
- Performed data cleaning, transformation, and EDA
- Identified key factors affecting delivery delay(route,shipment,type,etc.)
- Build predictive model to improve delivery performance insights
- Created visualization to support data-driven decision

Inventory and invoice Analysis | [GitHub](#)

Tools : Python, Matplotlib, Pandas, Scikit-learn

- Developed ML-based classification model for anomaly detection in invoices
- Achieved ~89% accuracy using supervised learning techniques
- Detected irregular transactions pattern reducing potential financial risk
- Applied full pipelines: preprocessing -> feature selection -> model evaluation

CERTIFICATIONS & ACHIEVEMENTS

- Deloitte Data Analytics Job Simulation - (Forage)
- GenAI Powered Data Analysis - (TATA Forage)
- Business Analytics with Excel - (Simplilearn)
- Basic of Machine Learning - (Great Learning)
- AI for Beginner - (HP Life)

EDUCATION

B.Tech in Computer Science and Engineering

Graphic Era Hill University, Dehradun

2022 - 2026
